

MIKE QUICK USER GUIDE

This quick guide will help you access the key features of Mike, Larsson's online catalogue & order portal. We recommend using the New Mike Website for phones & tablets. The functionality on the new & classic views is identical. On the new version products may be displayed in a list view and menus may hide & expand automatically according to screen size used. This will greatly improve the user experience on mobile devices.

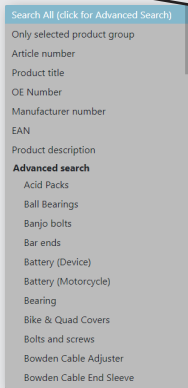

Click the **Mike Logo** to clear all current selections and return to the home page.

Click the **Magnifying Glass Icon** to view search field if it's hidden. Enter a brand, description or number (OE or aftermarket) to perform a quick search. If you have a bike selected, only fitments for this bike will be displayed.

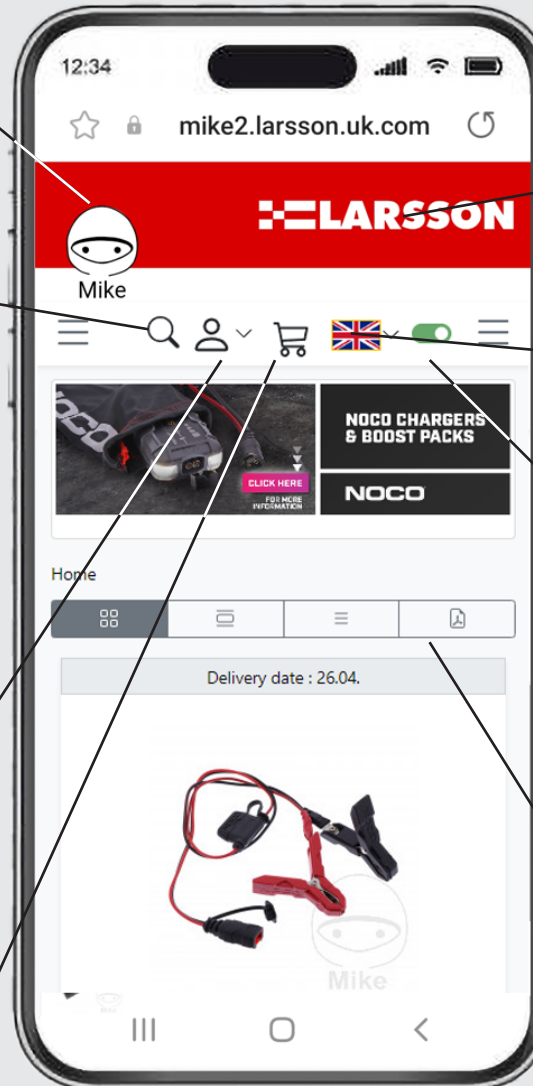

Click the **Advanced Search** down arrow and scroll down to select a parts category. This allows search by product attributes rather than by bike fitment for around 100 product types.

Click & select **My Account** to view/amend your account settings, view or manage saved vehicles, view orders or track support requests. You can also hide purchase prices & message us from this menu.

Click the **Trolley Icon** to view or checkout your current basket. You can also view your wish list, create & manage multiple shopping baskets & view past orders.

Click the **Larsson Logo** to view the Larsson UK website where you can access useful information, apply for a trade account, read our newsletters or find downloadable forms & guides.

You can use Mike in 9 European languages and switch between them at any time. Select the **Flag Icon** for your preferred language.

Toggle between the **New Mike Website** (recommended for mobile devices) and the classic view. Parts in your basket(s) will be visible in both views.

You can tab between Gallery (grid), mixed or list view using the **Page View Icon**. On small screens a list view will appear to preserve readability. You can also create a PDF of the page viewed (subject to size limitations) to save or print.

Click to browse parts by **Product Groups**. Parts are listed in levels of sub-groups, so navigating to more specific sub-groups will show less parts but will be more focussed. If you have a bike selected, only fitments for this bike will be displayed.

View & select up to 25 previously viewed products. Click **History** to hide or view. You can change the number in account settings. Click the pin icon to pin/unpin any item in the list.

RIGHTHAND MENU

Click here to choose a bike. Use the **Search Bike** facility using a model description, year (optional) or model code (eg CBR600/ PC40) or the **Select Bike** dropdowns (recommended if you are less sure of the exact model or year of manufacture).

EMBEDDED MENUS

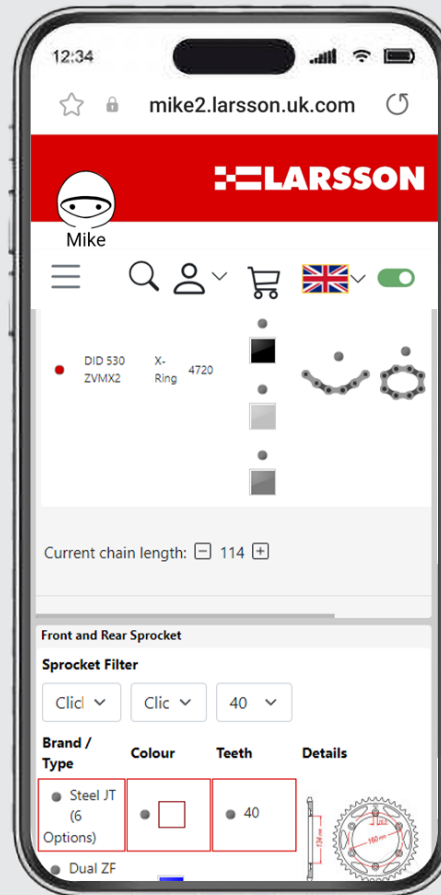

MIKE TECHNIK

Select a bike and view all the technical data by clicking on the information categories displayed. Technik data is only viewable in the new website. Click the **New Mike Website** toggle button if necessary. A subscription is required for this service.

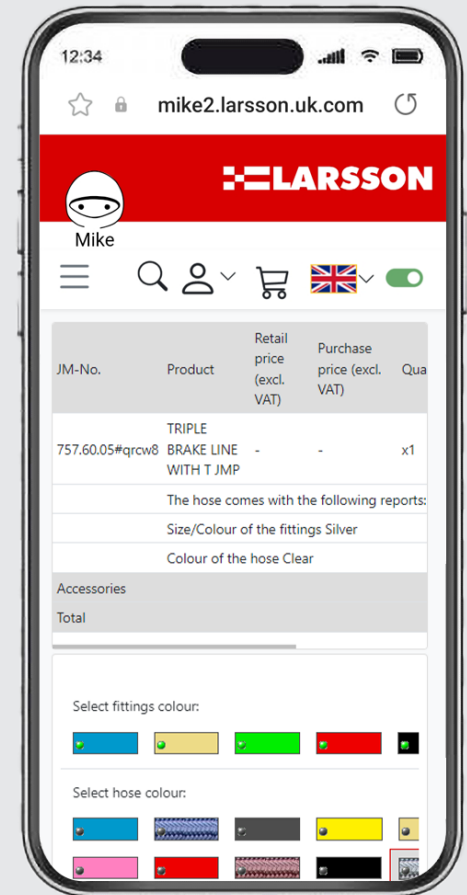

CHAIN KIT CONFIGURATOR

Select a bike, click **Transmission/ Chain Kits**, then select click on any kit to open the configurator. Menu options for pitch change may appear on the top right, while top left you can toggle between Standard view (picture based) or Advanced view (all options on view). You can now edit the kit to select chain brand, grade & colour, modify chain length, select front & rear sprocket options including size, brand, colour & sprocket type. If changing the gearing the configurator will automatically suggest a modified chain length. Pre-configured kits are available for many bikes and are listed when a bike is selected.

BRAKE HOSE CUSTOMISER

You can specify made to measure brake hoses using this tool. Without a bike selected, navigate to **Brakes/Brake Hose Customiser** in the Product Groups menu. Select the number/configuration of lines then construct your line ensuring you follow "How to measure" advice and selecting the type, size & colour of fittings, finish of hose plus any grommets required. Use care as incorrectly specified lines cannot be exchanged. Pre-configured kits are available for many bikes and are listed when a bike is selected.
